

# DIABETES MANAGEMENT

Diabetes care at UHS is initiated by the primary physician with support from nurses, dietitians who are Certified Diabetes Educators, and Endocrinologist (Physicians who specialist in diabetes). The two-hour diabetes class is filled with education on nutrition, common medication, review of current lab reports, self-monitoring and much more. The goal is for the person with diabetes to become the expert in managing their diabetes. [Click here](#) for more information regarding [Nutrition Care](#)
