

Podiatry Care

- As one of the most complex parts of your body, your feet deserve the highest level of care when they are in pain. Union Health Service has several podiatrists, (DPM) who are a licensed health care professional who diagnoses, treats, and prescribes medications for any disease, injury, deformity, or other condition of the foot.
- Podiatrists are experts in diagnosing, treating and preventing foot and ankle disorders. Further tests may be required. Some tests, such as x-rays or blood studies, may be performed in the office, while others, such as certain scans, may be ordered outside.
- Once a diagnosis is made, a treatment plan is presented; this plan might include any or all of the following things, among others: oral medication, locally injected medication, exercises, and devices to assure the proper alignment of the foot, surgery, arthroscopy, casting or other forms of immobilization.
- Podiatry Department Hours: Monday – Friday 8:30am to 4pm at Polk St. location only.
